

BETE Bitcoin & Ether Equal Weight ETF

Why BETE ?

- An ETF to target equal weighted performance of bitcoin and ether in a single investment.
- Capture the potential of the two largest cryptocurrencies.
- Familiarity, liquidity and transparency of an ETF.
- Available through a brokerage account—no need for a cryptocurrency account or wallet.

Fund Objective

BETE seeks investment results, before fees and expenses, that correspond to the performance of an equal weight basket of bitcoin and ether.

BETE invests in futures and does not directly invest in bitcoin and ether. There is no guarantee that the fund will meet its investment objective.

Growth of \$10,000 Since Inception

Fund Performance and Index History

	1Q 2025	Year to Date	1-Year	3-Year	5-Year	Fund Inception
ProShares Bitcoin & Ether Equal Weight ETF NAV Total Return	-31.08%	-31.08%	-26.84%	—	—	39.16%
ProShares Bitcoin & Ether Equal Weight ETF Market Price Total Return	-30.80%	-30.80%	-26.75%	—	—	39.39%
Bloomberg Bitcoin Index	-11.66%	-11.66%	16.53%	—	—	106.40%
Bloomberg Ethereum Index	-45.21%	-45.21%	-48.73%	—	—	6.26%

Periods greater than one year are annualized.

Please note: *This ETF may pay a monthly distribution, which is reflected in the total return performance shown above, unlike spot crypto products. Some third-party websites may display performance based only on price return. The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be more or less than the original cost. Shares are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Market price returns are based upon the midpoint of the bid/ask spread at 4 p.m. ET (when NAV is normally determined for most funds) and do not represent the returns you would receive if you traded shares at other times. Your brokerage commissions will reduce returns. Current performance may be lower or higher than the performance quoted. For standardized returns and performance data current to the most recent month end, call 866.776.5125 or visit ProShares.com*

¹Expenses with Contractual Waiver through September 30, 2025.

Fund Holdings²

Description	Value	Market Exposure
CME Bitcoin Futures 25/04/2025 BTCJ5	--	53.4%
CME Ether Futures 25/04/2025 DCRJ5	--	47.3%
Net Other Assets (Liabilities)	\$6,201,242	--
Total	\$6,201,242	101%

The fund obtains exposure to bitcoin and ethereum through entering into bitcoin and ethereum futures contracts. The assets of the fund are held in cash or invested in short-term cash instruments, including Treasury Bills.

²Fund Holdings are subject to change. Sum of weightings may not equal 100% due to rounding.

Investing involves risk, including the possible loss of principal. There is no guarantee any ProShares ETF will achieve its investment objective.

Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This and other information can be found in the summary and full prospectuses. Read them carefully before investing. Obtain them from your financial professional or visit [ProShares.com](https://proshares.com).

This ETF invests in bitcoin and ether futures contracts and does not invest directly in bitcoin or ether. Bitcoin and ether are each a relatively new asset class, and the market for bitcoin and ether is subject to rapid changes and uncertainty. Bitcoin and ether are subject to unique and substantial risks, such as rapid price swings and lack of liquidity, including as a result of changes in the supply of and demand for bitcoin and ether. Bitcoin and ether are largely unregulated and may be more susceptible to fraud and manipulation than more regulated investments. The value of an investment in the ETF could decline significantly and without warning, including to zero.

This ETF is actively managed. The costs associated with rolling (buying and selling) futures and the impact of margin requirements, collateral requirements and other limits may have a negative impact on performance and prevent the Fund from achieving its objective. The price and performance of bitcoin futures and ether futures should be expected to differ from the current "spot" prices of bitcoin and ether (the prices of bitcoin and ether that can be purchased immediately). These differences could be significant.

This ETF is non-diversified and is subject to risks associated with the use of futures contracts, leverage and market price variance, all of which can increase volatility and decrease performance.

Shares of any ETF are generally bought and sold at market price (not NAV) and are not individually redeemed from the fund. Your brokerage commissions will reduce returns.
